ACOUSTIC Organic

ORCHESTRA x DOB1997-507-015

Added value of the variety

- Tasty table potato with low input requirement.
- Washable and attractive skin.
- Gives high yields from all soil types.
- Tolerant to climatic stress.
- Early tuber bulking.

Characteristics

Shape of tuber	0					
Av. Tuber length (Ø 50-60 mm)	7,5	cm				
Maturity (9=early, 4=late)	6,6					
Colour of skin	LY			Į.		
Colour of flesh	6,6					
Suitability for cooking	7,7 A					
			А	в	с	D

Soil adaptability

ACOUSTIC Organic

		Size	75 cm	90 cm	Plant/ha
	Planting	28/30	22 cm	18 cm	60600
0.0	Plant soon after delivery to avoid pre-sprouting.				
	Do not cultivate on soils prone to common scab.	30/40	28 cm	23 cm	47600
	Plant deep and make big ridges in order to avoid tuber greening.	30/50	32 cm	27 cm	41700
	Plant in warm soils in order to avoid rhizoctonia.	40/50	36 cm	30 cm	37000
		50/60	39 cm	33 cm	34200

Fertiliser input (kg/ha):

Depending on the soil supply and applicable national legislation; total amount required by the variety.

							- Canada	3,8				
Nitrogen: Phosphate: Potassium:	(N) (P2O5) (K2O)	- 150 110 250	¥	¥	¥	¥	¥	¥	ł	¥	¥	- 150 110 250
To prevent mi	ineral defic	iencies, a	apply th	nese ele	ments	in time (B, Mg,	Mn, Ca	a)			

Supply 25% less nitrogen than your references varieties and apply all at planting time.

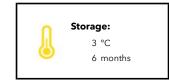

Crop protection

If a crop is in decline, the crop can be affected by Phytophthora, burn as quickly as possible to prevent a breakdown in resistance. Burn off while still green, follow up a week later by flailing/pulverising. Ensure any regrowth is controlled.

Harvest and storage

Wait for a proper set skin before harvest. Short dormancy; after harvest and wound healing cool down quickly, keep the temperature stable and start with sprout control. Susceptible to Fusarium.

Key advice to succeed this variety:

Before planting keep the seed quiet; plant them out of cold storage. Supply 25% less nitrogen than your references varieties and apply all at planting time. Wait for a proper set skin before harvest.

Short dormancy; after harvest and wound healing cool down quickly,

keep the temperature stable and start with sprout control.

Avoid

desprouting

before

planting
